2025 Subject Index

Title	Page
A bibliometric analysis of the 100 most cited genioplasty articles (1950-2025)	89
A bibliometric analysis of the literature on the use of artificial intelligence in pediatric dentistry	1
Aesthetic rehabilitation of a case of polydiastema in the upper anterior region with direct composite restoration using the injection molding technique: case report	24
Anterior diastema closure with direct composite resin: three case reports	55
Clinical experiences of dental students and recent graduates in prosthodontic treatments: a cross-sectional study	111
Comparison of the effects of different surface treatment methods on the bonding strength of CAD/CAM blocks to repair composites	101
Conventional and digital approaches in post-endodontic restorations	129
Current approaches to the diagnosis and management of bruxism	80
Dental students' perceptions of specialty training and career choice	117
Diabetes and periodontitis: current approach	35
Endodontic treatment procedures applied by endodontists and general dentists in Turkiye: a survey study	8
Enhancing clinical training through understanding patient attitudes toward rubber dam application by undergraduate dental students: a study at a university in Thailand	123
Evaluation of AI-based chatbot responses to orthodontic retention-related patient questions: a comparative analysis	74
Evaluation of tooth wear and gingival recession in individuals with obsessive-compulsive symptoms: a clinical study	94
Finite element analysis of stress distribution in implant, abutment, screw and bone using different superstructure materials in implant-retained fixed partial dentures	67
Is the implementation of the sixth-year clinical internship meeting the needs of dental students?	60
Lingual frenulum surgery in the treatment of ankyloglossia: case series	27
Management of amlodipine-induced gingival overgrowth and 1-year follow-up results: case report	85
Management of surgical treatment with autogenous graft for papilla reconstruction in cases of peri-implant papilla loss: 3-month follow-up	20
Performance comparison of artificial intelligence-based language models on oral pathology questions in dental education	31
Periodontal risk	42
Treatment of Miller class 3 gingival recession with free gingival graft and creeping attachment phenomenon: 2 case reports; 2-year follow-up	51
Use of polyetheretherketone (PEEK) in prosthodontics	135
Utilization of artificial intelligence in pediatric dentistry: a comprehensive literature review	16
